

USAMA HASSAN

UNITY GAME DEVELOPER

Lahore, Pakistan | +92 335 414 2155 | usamahassan944@gmail.com

Portfolio | LinkedIn | GitHub

PROFILE

Unity developer with 5+ years of experience building multiplayer, mixed reality, mobile, PC, and WebGL games. Specialized in gameplay architecture, real-time networking, AI systems, and backend integrations across shipped products and production prototypes.

CORE EXPERTISE

ENGINE & LANGUAGES	Unity, C#, C++, Python, JavaScript, SQL
MULTIPLAYER & BACKEND	Photon Fusion, PUN 2, Netcode for GameObjects, Unity Multiplay, PlayFab, Firebase, AWS
GAMEPLAY & ARCHITECTURE	Gameplay Systems, State Machines, AI / NavMesh, Physics, Data-Driven Design, Addressables
XR & PLATFORMS	Meta Quest, Mixed Reality, MRUK, Spatial Anchors, VR / AR, PC, Mobile, WebGL

PROFESSIONAL EXPERIENCE

Nexus Dev Studio

Jan 2025 - Present

Senior Game Developer

London, England (Remote)

- Co-developed **Nexus Arcade**, a shipped **Meta Quest mixed reality** arcade experience featuring single-player, co-located, and online multiplayer modes.
- Led development of the **Ten Pin Bowling and Shooting** modules, contributing core gameplay systems within a shared spatial MR hub.

Bleeding Edge Studio

Jan 2024 - Sep 2024

Senior Multiplayer Game Developer

Lahore, Pakistan

- Co-developed **Thunder Horse Racing**, a multiplayer mobile game with breeding, campaign, training, competitive racing, and persistent progression systems.
- Built **multiplayer and live-service features** including real-time events, championships, localization, and scalable data-driven content.
- Developed a multiplayer **F1 racing prototype** focused on vehicle control, networking flow, and competitive race mechanics.

Crosshair Technology / RIFT Games

Jan 2023 - Dec 2023

Game Developer

Lahore, Pakistan

- Co-developed **Animalia**, a multiplayer CCG-style PC game, contributing gameplay systems, **Photon Fusion** networking, and scalable architecture.
- Implemented **state-driven enemy AI** and gameplay logic for Maze, including distinct behavior patterns and dynamic player interactions.
- Extended a hyper-casual Rock Paper Scissors title, refining existing gameplay systems, stability, and performance.

Geniteam Solutions

Jan 2022 - Dec 2022

Software Engineer

Lahore, Pakistan

- Developed **Lost Soul District**, a multiplayer PC shooter prototype supporting **1v1, 3v3, and 5v5** team-based modes.
- Designed advanced AI for **TWET**, a multiplayer turn-based strategy game supporting mixed human and AI team compositions.
- Integrated **Firebase** database, social and email authentication, and analytics for a multiplayer mobile card game.

EDUCATION

BS Computer Science - FAST National University (FAST-NUCES)

2021

Lahore, Pakistan
